

Hi, it did not go exactly according to the assignment since I started improvising a bit, but I've already spent so much time on this that I made an executive decision, that it is finished now. Here are the instructions:

Select red or blue rectangle
and move it with arrow keys.

Select Blue Rectangle

Select Red Rectangle

Modify Blue Rectangle

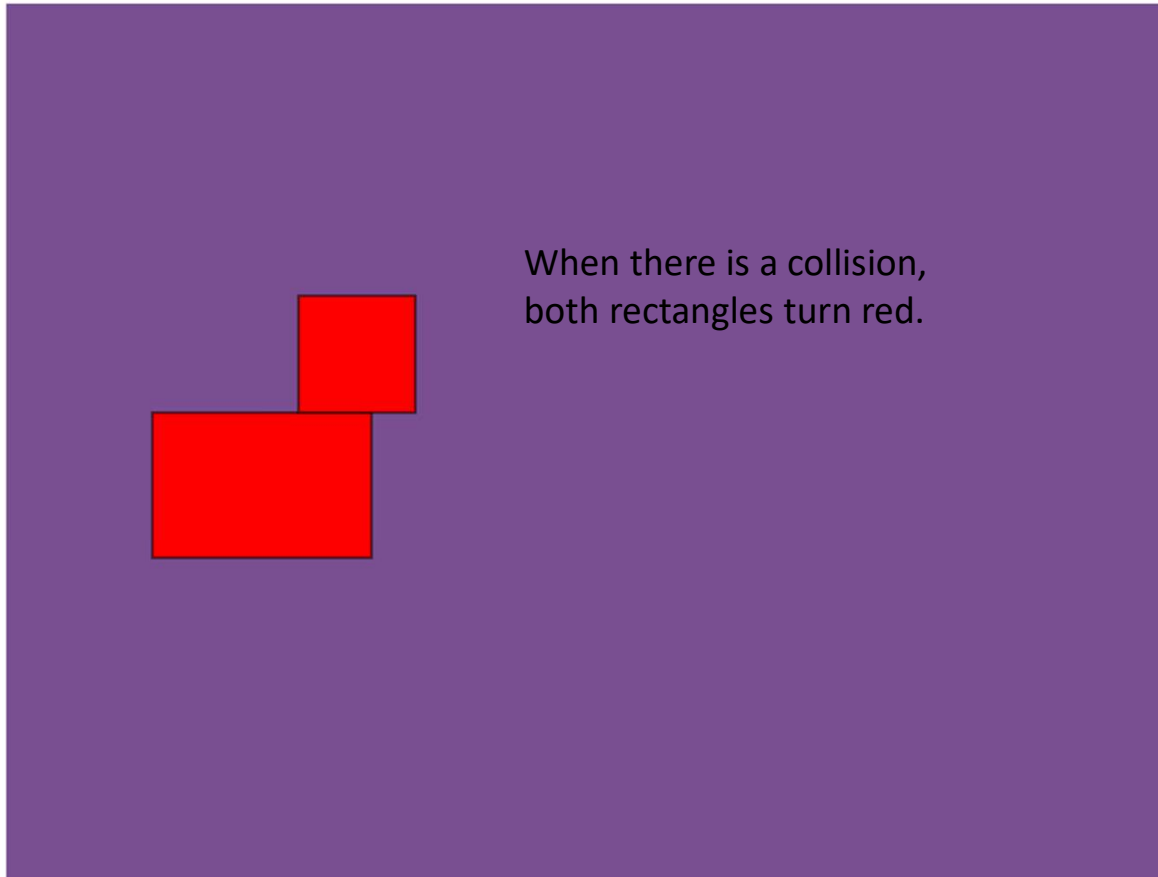

Modify Red Rectangle

Move Blue Rectangle

Move Red Rectangle

Active rectangle: Blue

instructions

Select Blue Rectangle

Select Red Rectangle

Modify Blue Rectangle

Modify Red Rectangle

Move Blue Rectangle

Move Red Rectangle

Active rectangle: Red

instructions

Press Modify Rectangles
(blue or red) to open modify
menu below.

Input new values and press
submit to change the size
and position of your
selected rectangle. It shows
an error message if you are
trying to place it outside the
canvas.

Select Blue Rectangle

Select Red Rectangle

Modify Blue Rectangle

Modify Red Rectangle

Move Blue Rectangle

Move Red Rectangle

Modify Red Rectangle

Left: 10

Top: 10

Width: 100

Height: 100

Submit

Active rectangle: Blue

instructions

Press Move Rectangles (blue or red) to open the move menu.

Input new values and press submit to move the triangle. It throws error if you are trying to place it outside of the canvas.

Select Blue Rectangle

Select Red Rectangle

Modify Blue Rectangle

Modify Red Rectangle

Move Blue Rectangle

Move Red Rectangle

Move Blue Rectangle To

X Coordinate: 400

Y Coordinate: 300
